

LCA partnered with local non-profit Proud Ground on this affordable housing project. In keeping with the organization's goals, LCA designed 14 separate three bedroom homes on individual lots, tied together by a shared court. To accommodate this new type of community design, LCA had to navigate changes in municipal code to incorporate shared pedestrian and parking/driveways. The open spaces combined a community play area with dedicated parking, and used ecofriendly materials such as pervious pavers to demarcate walking and driving areas.
