

Albertsons engaged LCA to lead the design and construction of a remodel and 8,000 SF Addition of their Lake Grove grocery store. The client was eager to address customer concerns regarding parking circulation, screened loading facilities, and a larger store size to support growing merchandise demand. LCA coordinated intensive negotiations with four neighborhood groups and the local jurisdiction to secure development rights for the project.

Long facades were modified with Craftsman-style wood columned canopies, highlighting the entries with visually intricate raised forms. The street-facing corner was designed with a Starbucks featuring a raised outdoor seating plaza. This was the third major renovation for the 1965 store, so it was critical to support the existing Albertsons while creating a new face in the Lake Grove Neighborhood.
